

Monday, September 17, 2018

The Fraser River Panel met Monday, September 17 to receive an update on the migration of Fraser sockeye and review the status of migration conditions in the Fraser River watershed.

At the meeting today, the run sizes for Early Summer, Summer and Late-run remained unchanged, 1.8 million, 4.344 million and 6.0 million, respectively.

On September 16, the Fraser River water discharge at Hope was approximately 1,692 cms, which is approximately 20% below average for this date. The temperature of the Fraser River at Qualark Creek on September 16 was 14.2°C, which is 0.5°C below average for this date. Fraser River water temperatures are forecast to decrease to 13.8°C over the next few days.
