

PSC Seminar Series

THE SALISH SEA MARINE SURVIVAL PROJECT: LESSONS LEARNED

**January 10, 2023; 12:00-1:30 p.m. Pacific time
Hyatt Regency, Vancouver BC**

The Southern Panel and Coho Technical Committee are pleased to announce a seminar for the PSC family, “Salish Sea Salmon: Resilience in a Changing Climate” featuring Jacques White and Isobel Pearsall, with a special introduction on the importance of salmon to Salish Sea Peoples by Kadi Bizyayeva January 10th, 2023, from 12:00 - 1:30pm (PST).

This will be the ninth in a series of seminars intended to provide information on environmental change, its effects on salmon across their life cycle, and salmon management from both western and indigenous perspectives. This series will feature noted speakers from the United States and Canada, followed by a facilitated Q & A session.

Participation in live seminars is available only for PSC family members. Each seminar is recorded and made available to the public on the [PSC website](#) and [YouTube channel](#) shortly after the live event.

This seminar will be held in-person during the PSC’s Post Season Meeting at the Hyatt Regency in Vancouver BC. The meeting room information can be found on the attached flyer and will also be made available on the [Members Portal](#). or by viewing the schedule of meetings posted in the PSC Secretariat office located in the Turner Room on the 4th floor of the hotel.

If you are unable to attend in-person you can use the registration link below to obtain the Zoom link to join the seminar.

Please register in advance (free of charge) at:

Future seminars will be scheduled throughout 2023. Potential topics include:

- Freshwater habitat challenges
- Forecasting for environmental variation
- New management strategies for uncertain times
- Changes in salmon life history and productivity
- Hatchery and wild salmon interactions: what is and is not known?
- Adaptive management in a changing climate.
