

Tuesday, August 1, 2023

The Fraser River Panel met Tuesday, August 1, to receive an update on the migration of Fraser River sockeye salmon and review the status of migration conditions in the Fraser River watershed.

It is currently estimated that 221,400 sockeye have passed the Mission hydroacoustics site. The Panel made no changes to run size at today's meeting.

On July 31 the discharge of the Fraser River at Hope was 2,415 cms, which is approximately 43% below the historical average for this date. The temperature of the Fraser River at Qualark Creek on July 31 was 19.3⁰C, which is 1.0⁰C above the historical average for this date. Fraser River discharge levels and water temperatures will be monitored closely to determine if specific management actions are required during the in-river migratory period to help achieve sockeye escapement goals.

All Panel Area Waters remain closed to commercial salmon fishing.

The next in-season meeting of the Panel is scheduled to occur on Friday, August 4, 2023.
