The Fraser River Panel met Monday, September 3 to receive an update on the status of the Fraser River sockeye and pink salmon runs and review the status of migration conditions in the Fraser River watershed.

Low numbers of Fraser sockeye continue to migrate through the marine assessment areas, while the marine migratory abundance of Fraser River pink salmon is presently at moderate levels.

At the meeting today, the run size estimates for Fraser River sockeye and pink salmon were unchanged: 155,000 Early Summer-run, 650,000 Summer-run, 100,000 Birkenhead, 510,000 true Late-run sockeye, and 10,000,000 pink salmon.

Fraser River discharge levels and water temperatures continue to be satisfactory for the migration of sockeye and pink salmon.
