

PSC Seminar Series

Hatcheries and the Future

**November 29, 2023; 2:00-3:30 p.m. Pacific time
Online via Zoom**

The Southern Panel and Coho Technical Committee are pleased to announce a seminar for the PSC community, “Hatcheries and the Future” featuring Robert Lackey (Oregon State University) and David Willis (Fisheries and Oceans Canada) on November 29th from 2:00 - 3:30pm (PST).

This will be the 18th in a series of virtual ZOOM seminars intended to provide information on environmental change, its effects on salmon across their life cycle, and salmon management from both western and indigenous perspectives. This series will feature noted speakers from the United States and Canada, followed by a facilitated Q & A session.

Registration for live seminars is available only for PSC community members. Each seminar is recorded and made available to the public on the [PSC website](#) and [YouTube channel](#) shortly after the live event.

Please register in advance (free of charge) at:

https://psc-org.zoom.us/webinar/register/WN_hVc2Kqj7QVCP67nSBwDuYw

Future seminars will be scheduled throughout 2024. Potential topics include:

- Interspecies Dynamics (e.g., carrying capacity, pinks, range shifts)
- Hypoxia/Ocean Acidification/Upwelling.
- Harmful algal blooms.
- Biological Oceanography and Salmon Prey
- Fishery Planning Models of the Future
- Toxins
- Indigenous Fisheries Management in the Yukon
- Resist-Accept-Direct (RAD) Framework for Salmon
- Climate Change Scenarios used by PFMC
- Monitoring and Assessment Systems

Upcoming Seminar Dates:

January 9, 2024 – Hyatt Regency Seattle

February 13, 2024 – Hyatt Regency Vancouver
